

In The Specification

✓
Please amend paragraph 0034 as follows:

01 0034 It should be noted that the latch keys 44a and 44b are formed in tapered shape such that it serves a self-guiding function for engaging the latch holes 40a and 40b in the cover member 30. The structure further includes an indicator means including means responsive to the position of said at least two latch holes to produce a signal related to the condition of said latch means.
